Subject: Logging out clothi s18 florida citrus assessment

Hi Tracking team,

Please log out the attached clothianidin section 18 on citrus. Thank you!!

Stacey and Tawanda—Mark and I are in the office tomorrow. Bill is not, and just a reminder that neither Bill nor myself are in at all next week. Let us know if you have any questions.

Thanks!

Michael

Hi Michael – Is it possible to share the draft with us now? And are you in the office tomorrow so that if I have questions we can discuss?

Hi Stacey and Twanda,

We are pretty much done with our assessment. I know you were trying to set up a meeting for next week, so when would you like to see a signed copy? Both Bill and myself are out of the office next week (and not really able to call-in either).

Thanks,

Michael

Subject: RE: Final draft of clothi document

I only have one suggestion and one comments

First, where we discuss the beekeeper mapping tool make clear we have not reviewed it for accuracy. Don't want to imply any endorsement of it from a science perspective

Second, minor point and may not be on your draft but the Header for Table 3 is on separate page from body of table. Make sure that is fixed

Otherwise looks good. I think RD scheduled a meeting for next week. Might want to see what they want from us as far as a signed copy is concerned. Check with them and let them know that both you and Bill are out of the office next week

Thanks and good job

Subject: Final draft of clothi document

Hi Mark,

Attached is the latest draft of the s18. I'd like to highlight the end of the risk characterization section (new stuff is in track changes) and the incident section after that as things you (and Bill) have not had a chance to look at yet. I included all species in the LOCATES run—not sure if I should have just put in the species

Thanks,

Michael
